

Getting the smile you have always wanted is simple with Smilelign.

The benefits are straightforward:

- Virtually invisible with little day-to-day impact.
- Removable to allow for good dental hygiene and cleanliness.
- Precisely planned, you see exactly how your future smile will look.
- Tailor-made by our technicians, the aligners give you maximum comfort.
- A cost effective solution - better value than similar on the market.
- A reliable way of giving you aesthetic results you can depend on, bringing your smile to life!

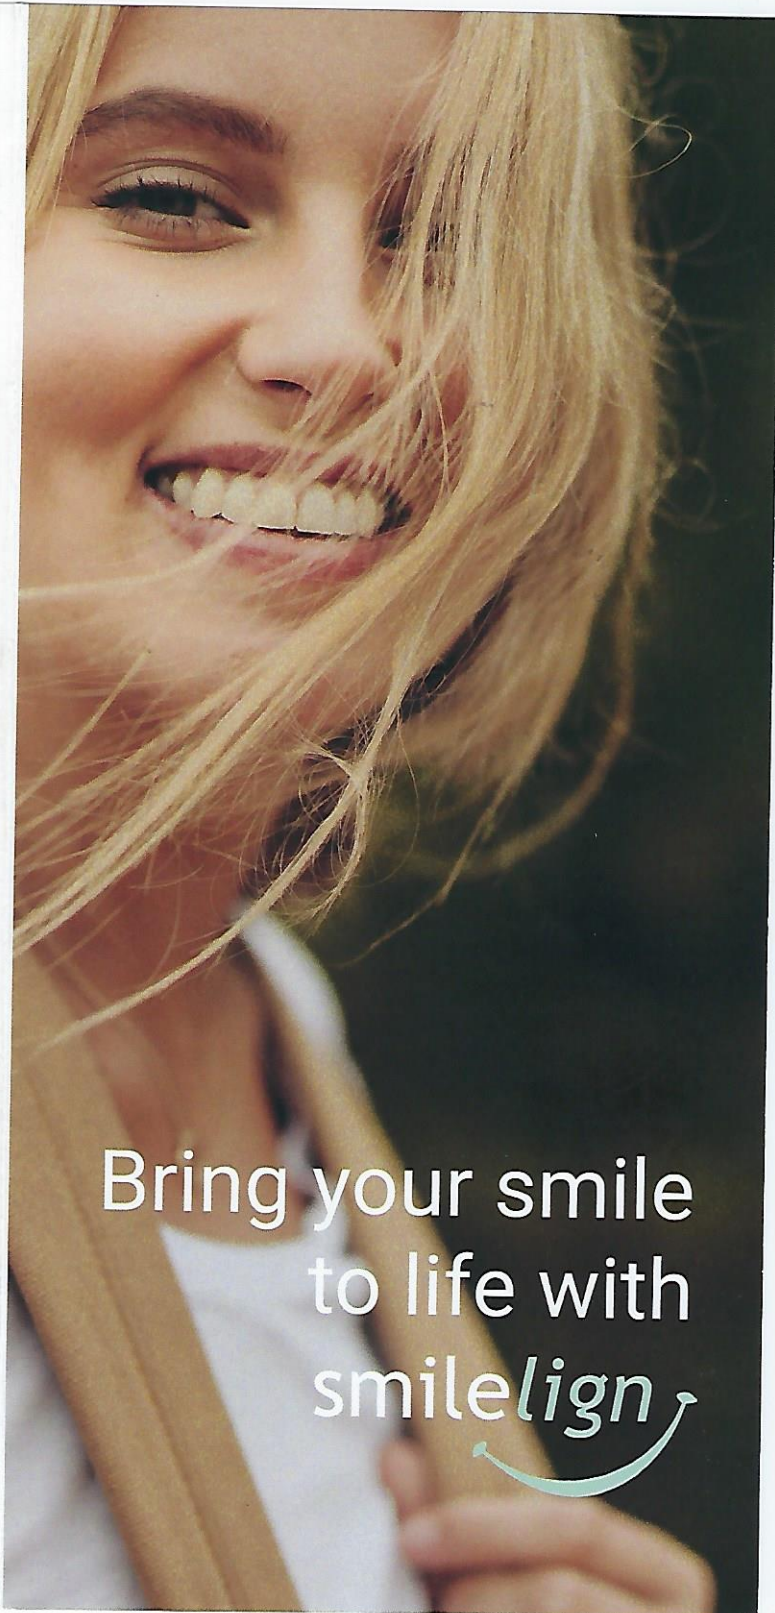

They look amazing - you can barely see them! I'm very happy and would highly recommend this treatment.

Bring your smile
to life with
smilelign

A discreet and removable clear brace system that works.

Clear.

Smilelign consists of a **series of clear braces**, each marginally different in shape, that move your teeth in small stages to create your future smile!

Removable.

Worn for **2 weeks** at a time, the braces are removable. This makes them a seamless addition to your lifestyle, and also helps maintain good oral health.

Bespoke.

At your initial consultation, your dentist will take your impressions. From these, our skilled technicians will **create your new smile**, mapping the journey that your teeth will take before they reach their final position.

Unique.

Once our skilled technicians have planned your treatment, your dentist will receive this along with a set of **pre-aligners** - exclusive to Smilelign. These are a set of braces for you to wear and ensure that clear braces are right for you.

'Wow, your teeth look amazing! They're perfect!' - the improvements are clear...

Sarah, Nottingham

3 clear, simple steps.

Achieving your future smile really is that simple.

1. Your future smile is designed and mapped by our skilled technicians.
2. View the planned outcome with your dentist and try in your bespoke pre-aligners before proceeding.
3. You wear each aligner for 2 weeks until your future smile is no longer an aim, but a reality.

Within a couple of weeks, my treatment had begun. It took just over 20 weeks and I am so pleased with my new smile.
